3D Foils to showcase unique 'crushed ice' surfaces

3D Foils' range of crushed ice decorative surfaces will be the highlight of **Stand no. 38** at PUB16 on 9-10 February 2016.

For bar fronts or back bars, 3D Foils' **ICE** range offers unique optical effects to appeal to publicans wishing to differentiate their bar design from the more traditional. **ICE Laminated Amber** will be launched at PUB16. Reminiscent of a classic malt whisky by night and sugar crystals by day, ICE Laminated Amber will be joined by **ICE Laminated Quartz** as towering 1.7m high monoliths, sparkling with LED lighting, as a large-scale illustration of these stunning surfaces.

Also prominent will be our **Glas AR+** range of vintage mirrors, metallics, and sophisticated 'gold leaf' effects.

In addition we will be demonstrating how our **MAGNETIC** backed panels contribute to saving time and money on refurbishment costs.

Newcomers **Granites** in neutral tones will be on show for the first time in the UK.

3D Foils last exhibited direct to the sector in 2008 at the Bar08 trade show. As Managing Director Paul Merrick comments: "bar fronts and back bars form the backbone of our product offering so we welcome the creation of PUB as an opportunity, at last, to once again display our specialist surfaces direct to pub entrepreneurs."

3D Foils Ltd offers a large product range and has helped many a bar owner to find that special finish for the focal point of their establishment. For publicans planning to refurbish, a visit to **Stand 38** is a must to view a taster of the products on offer.

About 3D Foils Ltd

3D Foils Ltd has supplied unique and quality decorative surfaces to the leisure industry for 16 years. **Our aim is to offer products that enable our customers to differentiate their brand from the competition.** We are a market leader in introducing innovative decorative surfaces in the UK and offer both 'off the shelf' and bespoke products.

The driving force behind 3D Foils is Managing Director, Paul Merrick, who works 1:1 with bar owners, designers, and contractors to support and help achieve the balance between aesthetics and practical considerations.
